PROFESSIONAL SUMMARY

Software Engineer and Computer Science graduate with 2+ years of experience building high-performance, decoupled web applications. Skilled at bridging robust backend data integrity with clean, modern, type-safe frontend interfaces, including engineering decoupled transaction platforms and optimizing database query performance with B-Tree indexing. Completed 5+ projects across 8+ core technologies spanning frontend development, backend development, API integration, and graphic design.

CORE SKILLS

- ❖ **Frontend Development:** Building responsive, interactive, type-safe web interfaces using React, Next.js, TypeScript, and Tailwind CSS
- ❖ **Backend Development:** Engineering stateless REST APIs, managing database schemas, and backend logic using PHP, Laravel, and MySQL
- ❖ **Software Development:** Designing full-stack, decoupled applications focused on solving real-world operational bottlenecks
- ❖ **API Integration:** Connecting frontend components to backend endpoints and third-party services with strict data validation
- ❖ **Graphic Design:** Crafting visually appealing digital assets and layout structures for modern web platforms

TECHNICAL SKILLS

- ❖ **Languages & Markup:** HTML, CSS, JavaScript, TypeScript, PHP
- ❖ **Frameworks & Libraries:** React, Next.js, Tailwind CSS, Laravel, React Native
- ❖ **Databases:** MySQL
- ❖ **Tools & Other:** Adobe Photoshop, Microsoft Word, REST API Design, Database Schema Design

PROFESSIONAL EXPERIENCE

Grow In Tech

December 2025 – Present

Chief Technical Officer (CTO)

- ❖ Designed, developed, and launched the company's first official website, establishing its online presence
- ❖ Evaluate new project ideas by assessing technical feasibility, resource requirements, and overall business value before development
- ❖ Translate complex technical concepts into clear, practical plans, helping team members understand project objectives, scope, and implementation strategies
- ❖ Serve as the primary technical advisor for software-related client inquiries, reviewing project requirements and recommending appropriate technical solutions
- ❖ Collaborate with the team to define project architecture, development workflows, and technology choices that align with business goals.

DHL Service Outlet

June 2021 – September 2022

Logistics Assistant

- Processed and prepared customer parcels and documents for domestic and international shipments, ensuring compliance with shipping requirements
- Packaged shipments accurately before handing them over to courier personnel for delivery
- Tracked customer shipments and monitored delivery progress to ensure parcels reached their intended destinations
- Maintained accurate and organized records of shipments, customer information, and delivery details
- Assisted customers with shipment inquiries and provided updates on the status of their parcels when required

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Caleb University, Ikorodu Imota, Lagos, Nigeria
